## EDUCATION

---

### University of California, Berkeley

Aug. 2023 – Present

*Physics, Mathematics, Electrical Engineering & Computer Science (Minor)*

*Berkeley, CA*

- Relevant Coursework: Data Structures, Deep Learning for Visual Data, Advanced Programming in R, Computer Programs, Communication Networks, Information Devices and Systems, PCB Engineering
- Launchpad AI/ML, Hands-On PCB Engineering Course Staff (Spring 2024)
- 2023 National Merit Scholarship Finalist (awarded to <1% of students)

### IBM Professional Certification in Machine Learning

Jan. 2023 – Jun. 2023

*Certification*

*Remote*

- Studied the fundamentals of machine learning including regression, clustering, classification, deep learning, and reinforcement learning
- Completed capstone project using machine learning to build recommender systems

## EXPERIENCE

---

### Kairos Academics

Apr. 2023 – Present

*Tutor*

*Remote*

- Provide one-on-one tutoring to high school students in math and science
- Develop personalized lesson plans and study strategies to address individual student needs and learning styles
- Monitor student progress and adapt teaching methods to ensure comprehension and academic growth

### Amazon

Aug. 2023 – Dec. 2023

*OpenSearch Contributor*

*Remote*

- Selected as member of 2023 OpenSearch Contributor Initiative
- Contributed to the [opensearch-project/ml-commons](https://github.com/opensearch-project/ml-commons) GitHub repository by developing machine learning algorithms, unit tests, and plugins in Java
- Collaborated with undergraduate students, graduate students, and industry professionals across the globe under the mentorship of Machine Learning Engineers at Amazon

### UC Irvine, Department of Physics & Astronomy

Feb. 2022 – Jul. 2023

*Researcher*

*Irvine, CA*

- Developed, trained, and tested TensorFlow/Keras deep learning models to address data scarcity issues in high momentum collision analysis with >90% accuracy
- Simulated particle collisions using MadGraph, Pythia8, Delphes, and ROOT and wrote reconstruction algorithms in C++ and Python to predict particle mass with <2% error

### SimpleMath Foundation

Aug. 2021 – Jun. 2023

*Head of Tutoring*

*Irvine, CA*

- Led a team of 11 tutors to provide academic support to children from underserved communities, helping improve their understanding and confidence in math
- Personally tutored 2 students each week, tailoring instruction to meet individual needs and learning styles
- Created and published a series of engaging and informative YouTube videos on key math concepts

## PROJECTS

---

## TECHNICAL SKILLS

---

**Languages:** Python, R, C++, Java, HTML/CSS, JavaScript, SQL

**Frameworks:** ROOT, Flutter, Flask, TensorFlow/Keras, PyTorch, Mockito

**Libraries:** Pandas, NumPy, Matplotlib, SciKit-Learn, BeautifulSoup
